European Union
Statement by

Ms. Marjolijn van Deelen
Special Envoy for Disarmament and Non-proliferation
European External Action Service

EU general statement at the Ninth Review Conference of the BTWC
(28 November – 16 December 2022, Geneva)

Geneva, 28 November 2022

- CHECK AGAINST DELIVERY –
Mr. President,

I have the honour to speak on behalf of the European Union.

The Candidate Countries North Macedonia*, Montenegro*, Ukraine and Republic of Moldova and the potential candidate countries Bosnia and Herzegovina* and Georgia, and the EFTA country Norway, member of the European Economic Area, align themselves with this declaration.

Let me start by congratulating you, Ambassador Bencini, for your nomination as President of this Review Conference and by commending you for your efforts in preparation of this very important meeting. We have full confidence in your capacity to guide us through the deliberations as we strive for a successful outcome. You can count of the EU’s support in this endeavour.

The EU is firmly committed to a multilateral and treaty-based approach that maintains and reinforces international peace and security. The Biological and Toxin Weapons Convention (BTWC) is one of the major pillars of the global disarmament and non-proliferation architecture. It embodies the important and legally-binding norm that the development, production, stockpiling and usage of biological agents and toxins as weapons is unacceptable.

The EU recognises that biological agents and toxins are widely used for peaceful purposes in line with the BTWC provisions. At the same time, the risk of natural or accidental spread of dangerous pathogens exists. With the COVID-19 pandemic we have witnessed how quickly diseases can cross borders and how dangerous and disruptive they can be. This is why it is more urgent than ever to strengthen the BTWC and its implementation.

Taking into account this context and given the substantive work realised by States Parties during the current review cycle, the Ninth Review Conference represents a unique opportunity not only to strengthen the Convention and its implementation, and to improve biosafety and biosecurity globally, but also to advance assistance, cooperation, response and preparedness of the States Parties.

As a long-term supporter of the BTWC, the EU is firmly committed to contributing to the success of the Ninth Review Conference of the BTWC. Our primary aim is to adopt forward-looking decisions and recommendations, which will provide a clear roadmap for the next review cycle, based on a productive intersessional programme.

As part of this strong commitment to a successful Ninth Review Conference, the EU has provided substantial support to this end. In particular, I would like to mention the series of EU-sponsored Regional Workshops for Europe and the Middle East, the Americas, Asia and Africa that were organised by the ISU in preparation for the Review Conference. The goal of these workshops was to increase common understanding of key issues and challenges and to facilitate building consensus on the need for, and measures required for, reinforcement of the Convention. The report of these Regional Workshops will be presented during a side event on

* North Macedonia, Montenegro and Bosnia and Herzegovina continue to be part of the Stabilisation and Association Process.
1 December. I would also like to note that the EU is sponsoring 28 delegates from 25 States to participate in this Review Conference.

The EU Position on the Ninth Review Conference has been submitted to the Review Conference as a Working Paper. It includes a broad range of specific measures supported by the EU with a view to strengthening the BTWC. This statement will only emphasise certain priority issues while we remain ready to provide further information on EU position on all topics, as appropriate, during the upcoming deliberations.

Mr. President,

The European Union regards verification as a central element of a complete and effective disarmament and non-proliferation regime, including within the BTWC. The EU reiterates its readiness to explore the issue of verification in greater depth, taking into account the developments in science and technology relevant to the Convention as well as the evolution of the threat. In this regard, the EU encourages the Review Conference to take action on near-term, concrete measures that would immediately strengthen the BTWC while negotiating further measures to strengthen the BTWC and its implementation in the upcoming intersessional period, including on increasing transparency and enhancing assurance in compliance. We call on States Parties to approach these issues in a constructive and ambitious manner and welcome concrete proposals.

Taking into account the rapid developments in life sciences and in technology relevant to the Convention, the EU furthermore supports the Ninth Review Conference in delegating certain decision-making powers to the Meeting of States Parties.

The EU also supports the concrete implementation of Article X of the BTWC through the numerous assistance programmes the EU and its Member States have undertaken. We consider international cooperation and assistance for peaceful purposes in the framework of the BTWC one of the most important aspects of the Convention, especially considering the experiences of the COVID-19 pandemic. Further action to enhance international cooperation, assistance and exchange in biological sciences and technology for peaceful purposes, on promoting capacity building in the fields of disease surveillance, detection, diagnosis, and containment of infectious diseases is of utmost importance. We stand ready to explore relevant initiatives aiming at reinforcing biosafety and biosecurity.

In addition, the EU supports the promotion of biorisk management standards as a concrete measure to strengthen biosafety and biosecurity at the international level.

Furthermore, the EU supports a Science & Technology Review Process based on more frequent and focused assessments of relevant scientific and technological developments, which may have implications for the BTWC. Such a Review Process has gathered widespread support since the Eighth Review Conference and its establishment is urgent and necessary to keep pace with advancements. The EU specifically supports the establishment of a dedicated board of experts and scientists. Such a mechanism could help identify emerging risks of potential misuse of technologies and expertise in dual use research and their potential relevance to the goals and objectives of the BTWC. The EU also supports the adoption of a voluntary code of conduct for
scientists as an element in this process, as well as the establishment of a science and technology officer position within the ISU.

The EU also supports the operationalisation of Article VII, regarding assistance to States Parties that have been exposed to danger as a result of a violation of the Convention. Building on agreements reached at the Eighth Review Conference, which supported “the establishment of a database open to all States Parties to facilitate assistance under the framework of Article VII” as well as the establishment of guidelines for seeking assistance under Article VII, we particularly support the proposal by France and India to establish such a database.

Another priority of the European Union and its Member States is universal adherence to the Convention. We are pleased that since the Eight Review Conference in 2016, six States have joined the Convention: Samoa, Palestine, Niue, Central African Republic, Tanzania and Namibia. We furthermore call on all States not party to the Convention to adhere thereto without further delay. We encourage them to participate as observers in formal BTWC meetings and to implement, on a voluntary basis, its provisions. In line with this priority, the EU has carried out, in the run up to this Review Conference, demarches on universal adherence to the BTWC with States not party to the Convention.

We welcome the fact that in 2021 a record number of reports on Confidence Building Measures (CBMs) was submitted by States Parties. We strongly encourage all States Parties to use EU-funded assistance tools such as the CBM guide and the electronic CBM facility to submit their annual CBM reports to the ISU. The EU furthermore recalls its long-standing support to further confidence building measures such as peer reviews, voluntary visits and other initiatives that contribute to enhance transparency.

At the same time, we also encourage States Parties to participate in peer review initiatives and voluntary visits to relevant facilities and other transparency and confidence-building initiatives. It is important to note that these initiatives are not designed to be substitutes for a legally-binding verification mechanism, but to strengthen national implementation and thereby the BTWC.

The assistance the ISU provides to States Parties for the implementation of their Treaty obligations and to the intersessional work programme is invaluable. The EU continues to support the strengthening of the ISU’s role.

Timely and full contributions to the BTWC budget are the essential requirement for the functioning and strengthening of the Convention, including for convening regular meetings and sustaining the ISU. Once again, we call on all States to fulfil their financial obligations under the Convention and to pay their assessed contributions on time and in full. We urge States Parties in arrears to pay their dues without further delay.

Mr President,

Since 2006, the European Union has provided substantial financial support of circa EUR 12 million to BTWC core activities. The two Council Decisions that are being implemented by the
ISU provide approximately 5 million EUR in support of the BTWC. The latest decision was adopted in November 2021 and it provides 2 million EUR support notably to activities in Africa in the context of the Global Partnership Signature Initiative strengthening Biosecurity in Africa. There will be several side events on projects conducted as part of European Union support to the BTWC.

Moreover, the EU is a staunch supporter of the UN Secretary-General's Mechanism for investigation of alleged use of chemical and biological weapons, the UNSGM. Currently we provide 1.4 million EUR in support of UNODA’s efforts to further operationalise and strengthen this mechanism, which is the only existing international independent mechanism for investigating alleged use of biological weapons.

In this context, I also wish to also mention the important EU CBRN Centres of Excellence Initiative that aims at enhancing the institutional capacity of partner countries to mitigate CBRN risks, whether deliberate, accidental, or natural in origin. Under this initiative, more than 90 projects have been funded, with one third of them addressing biological security amounting in overall to EUR 85 million. There will be a Side Event today (28 November) at 13.00 presenting the EU CBRN Centres of Excellence.

Mr President,

The EU underlines that gender equality and the empowerment of women and girls is an important horizontal priority for the Union and emphasises the importance to integrate gender perspectives into discussions in the BTWC. Furthermore, as a firm supporter of Action 36 of United Nations Secretary-General’s Agenda for Disarmament, which focuses on the “Full and Equal Participation of Women in Decision-Making Processes”, the EU fully supports and promotes the equal participation of women and men in the field of disarmament, non-proliferation and arms control and encourages women’s participation at the BTWC Review Conference.

We also support disarmament and non-proliferation education, to which the EU Non-Proliferation Consortium, the European network of independent think tanks, is contributing with various activities. In line with the EU Youth Strategy, the EU also encourages the inclusion of youth in the debate relating to the BTWC. To that end, the EU recalls that on 21 January 2019 it adopted a Decision that provides funding in support of a project aimed at providing capacity-development opportunities for young policymakers, scientists and academics from the Global South engaged in fields related to the BTWC. A side event on the presentation of the recommendations of the Youth for Biosecurity initiative partners for the Review Conference will take place on 30 November.

Mr President,

We note that Russia has invoked procedures under Article V and Article VI of the Convention. Regrettably, this long-awaited Ninth Review Conference of the BTWC takes place at a time when Russia's unprovoked and unjustified war of aggression against Ukraine rages on, and Ukraine’s civilian population and civilian infrastructure is being deliberately targeted and destroyed. We condemn in the strongest possible terms Russia’s aggression, which grossly
violates international law and the UN Charter, and undermines international peace and security. As part of its aggression against Ukraine, Russia has been engaged in a campaign of disinformation in spreading unsubstantiated and unfounded claims, among other things, regarding alleged development of biological weapons in Ukraine.

Articles V and VI are crucial in ensuring confidence in compliance with the BTWC. They should therefore be invoked only on a well-founded basis. Efforts to misrepresent or undermine legitimate health related research and capacity building, including for strengthened biosafety and biosecurity, only weaken the Convention and undermine international cooperation for peaceful purposes under Article X. This includes important efforts to prevent, detect and control possible outbreaks of disease, which the European Union strongly supports.

The processes under Article V and VI have been concluded. Any further discussion here on the allegations would only prove the lack of good faith towards this Review Conference’s goals. The States Parties should focus on the important task ahead of us: to strengthen the BTWC and its implementation, to ensure the Convention remains responsive to S&T developments, and to pave the way towards a productive intersessional period.

Mr President,

Allow me to assure you once again that the European Union and its Member States have a strong interest in a successful Ninth Review Conference and will spare no effort to this effect.

Thank you.
