

**STATEMENT ON BEHALF OF THE AFRICAN GROUP**

**BY**

**H.E. SAMBA SANE  
AMBASSADOR AND PERMANENT REPRESENTATIVE  
OF THE REPUBLIC OF GUINEA BISSAU, AND CHAIR OF THE AFRICAN  
GROUP FOR THE MONTH OF OCTOBER 2025**

**AT**

**THEMATIC DEBATE OF THE FIRST COMMITTEE:  
OUTER SPACE (DISARMAMENT ASPECT)**

**DURING THE 80<sup>TH</sup> SESSION OF THE UNITED NATIONS GENERAL ASSEMBLY**

**NEW YORK, THURSDAY, 27 OCTOBER 2025**

**Please check against delivery**

**Mr. Chairman,**

1. The African Group aligns itself with the Statement delivered by the Representative of the Republic of Indonesia on behalf of the Non-Aligned Movement (NAM) and wishes to make the following remarks.

2. The outer space and other celestial bodies must continue to be regarded and safeguarded as the common heritage of humankind and must be used, explored and utilized for peaceful purposes for the benefit and interest of all Member States, irrespective of their social, economic or scientific development.

3. The African Group stresses the importance of the prevention of an arms race in outer space through a legally binding instrument that would complement the international legal framework in a manner that allows for the equal exploration of outer space based on the principles of non-appropriation and peaceful uses of outer space in conformity with the five United Nations Treaties governing space activities, in particular, the 1967 Treaty on Principles Governing the activities of States in the exploration and the use of outer space, including the Moon and other celestial bodies.

**Chair,**

4. The Group welcomes General Assembly resolutions 78/19 on "Prevention of an Arms Race in Outer Space" and 78/21 on "No First Placement of Weapons in Outer Space". These two resolutions

reaffirm the importance and urgency of the objective of preventing an arms race in outer space and the willingness of all States to contribute to reaching these common goals. We also welcome resolution 78/52 on “Transparency and Confidence-Building Measures in Outer Space Activities”, which reaffirms that “preventing an arms race in outer space is in the interest of maintaining international peace and security”.

5. The African Group Welcomes the consensual adoption by the Group of Governmental Experts established pursuant to United Nations General Assembly 77/250 “Further Practical Measures for the Prevention of an Arms Race in Outer Space” of its report on 16 August 2024, and unequivocally supports the current efforts to form a single open ended working group on addressing the issue of Prevention of Arms Race in Outer Space, in all its aspects, and further calls upon all parties to contribute faithfully and positively to these efforts.

6. In this context, the Group unequivocally wishes to stress the urgent need for our planet, including outer space, to be free of nuclear weapons, weapons of mass destruction, and indeed all other kinds of weapons, as their presence constitutes an existential threat to global peace and security as well as the survival of humanity.

**Chair,**

7. The African Group underscores the paramount importance of strict compliance with existing arms limitation and disarmament agreements relevant to outer space, including bilateral agreements, and with the existing legal regime concerning the use of outer space. The Group also calls for the promotion and strengthening of international cooperation in the exploration and use of outer space for peaceful purposes.

8 The Group emphasizes the urgent need for the commencement of substantive negotiations in the CD on a legally binding and multilaterally verifiable instrument on the prevention of an arms race in outer space (PAROS) in all its aspects.

9. The African Group recalls the adoption of the African Space Policy and Strategy and regards it as an important Policy framework towards the realization of an African Outer Space Programme within the framework of Agenda 2063 of the African Union.

10. The Group also welcomes the establishment of the African Outer Space Agency and reiterates that the immense potential of space technology and applications should be equally beneficial to all Member States. On this note, the African Group stresses on the imperative to Promote equal and non-discriminatory access to outer space for all nations.

**Chair,**

11. The African Group maintains that the recommendations of the Group of Governmental Experts on Transparency and Confidence-Building Measures in Outer Space Activities continue to represent an important contribution towards maintaining outer space for peaceful purposes.

12. The intentional creation of space debris arising from the deliberate destruction of space systems represents a major concern for the African Group due to its consequences on the future of exploration and use of outer space. Therefore, the mitigation of space debris and the prohibition of their intentional creation through the deliberate destruction of space systems should be among the priorities of the work of the United Nations. Challenges related to space activities, in particular space debris, should be addressed in such a way that it will not jeopardize the development of the peaceful space capabilities of developing countries.

**13. Thank you.**
