

Statement by

**Ms. Benedicta D. Kristanti
Political Coordinator
Permanent Mission of the Republic of Indonesia to the United Nations.**

**The First Committee of the 80th Session of the UN General Assembly
Cluster 1: Nuclear Weapons
New York, 21 October 2025**

Mr. Chair,

Indonesia aligns itself with the statements delivered on behalf of the Non-Aligned Movement, ASEAN, and the States Parties of the TPNW.

In our national capacity, allow me to highlight two points.

FIRST, restoring credibility in nuclear disarmament.

The continued erosion of long-standing arms-control frameworks, the modernization of nuclear arsenals, and the normalization of nuclear deterrence as a security doctrine have severely undermined global security and stability.

These trends must be reversed by the Nuclear-Weapon States through the full implementation of their disarmament obligations under Article VI of the NPT.

For Indonesia, the complete and irreversible elimination of nuclear weapons remains the only credible path to restore trust and guarantee lasting global security.

The 2026 NPT Review Conference should serve as a momentum to reaffirm our shared commitment toward a world free of nuclear weapons.

SECOND, strengthening the nuclear disarmament architecture.

We underline the importance of the CTBT's entry into force and the universalization of the TPNW as reinforcing instruments toward nuclear disarmament.

Negotiations in the Conference on Disarmament must also be revived, particularly on the cessation of the nuclear arms race and nuclear disarmament, followed by legally binding negative security assurances, which continue to enjoy broad support.

We must advance regional disarmament architecture by establishing nuclear-weapon-free zones where they do not yet exist, including in the Middle East.

Within Southeast Asia, Indonesia reiterates the call for the immediate accession of the Protocol to the Southeast Asia Nuclear Weapon-Free Zone Treaty by all Nuclear-Weapon States. In this regard, we seek your support for the biennial Draft Resolution on the Bangkok Treaty presented by Malaysia as Chair of ASEAN.

Checked against delivery

Lastly, a strong disarmament architecture should also be strengthened, to ensure that potential integration of emerging technologies with nuclear delivery system maintains meaningful and effective human control.

Mr. Chair,

As we approach the 80th anniversary of the United Nations, let us make the elimination of nuclear weapons not only an aspiration, but a reality.

Thank you.
