

Submission of the Republic of Moldova under General Assembly resolution 80/25

**„Relationship between disarmament and development”**

The UN General Assembly reiterates its invitation to Member States to provide the Secretary-General with information on measures and efforts to allocate a portion of the resources resulting from the implementation of disarmament and arms limitation agreements for economic and social development, with a view to reducing the increasingly widening gap between developed and developing countries.

The Republic of Moldova is a developing country; accordingly, the resolution in question is addressed more to developed countries.
