

## PERMANENT MISSION OF ARMENIA TO THE UNITED NATIONS

---

### Global POC Directory

The establishment of global points of contacts is itself a confidence building measure aimed at increasing transparency, predictability and reducing the tensions and risks of the conflict stemming from the use of ICTs. The establishment of the global POC directory requires shared commitment and engagement from all member states, without any reservations. The promotion of practical cooperation should be the main task of the global POC Directory. Taking into account the potential of growing threats and misperceptions stemming from the use of the ICTs, at the beginning, in the spirit of transparency, the ICT incidents, the trends and threats in the cyberspace may be at the focus of information exchanges. Furthermore, it may include other aspects, such as the awareness raising initiatives, exchanges of best practices and lessons learned. We believe that the features of the Directory may be developed during the process of implementation of the initial phase.
