Inputs from India on Capacities required to engage in Points of Contact Directory

Cyber Security and Cyber crime

1. The PoC Directory may include the nodal Government agencies of the Members states that deal with responding to cyber security and Cyber Crime incidents. These PoCs may be used for sharing of information and responding to Cyber incidents.
2. The ideal nodal agencies would be the National Computer Emergency Response Teams (CERTs)/Computer Security Incident Response Teams (CSIRTs) for Cyber security Incidents. The Ideal nodal agency for the cybercrime reporting will be the nodal Law Enforcement agency of the Member state.
3. In case if the member states have a unified or multiple agencies to deal with cyber security and cybercrime incidents, the details of the key agencies may be added in the PoC directory.

Capacity Building

4. Inclusion of these agencies will help to improve the effective communication and cooperation between member states for actionable and practical cooperation between the Member states.
5. PoC of the department under the Foreign affairs ministry of each member state may be added as the PoC for sharing information on capacity building activities.
6. If there are dedicated ministries that deal with Skilled Manpower development/training/capacity building may also be provided by the member states as an additional PoC for Capacity Building activities.
