Draft Outcome Document

I. 2024 Declaration

A renewed commitment to peace, security, and sustainable development by preventing, combating and eradicating the illicit trade in and diversion of small arms and light weapons in all their aspects and enhancing international cooperation and assistance.

We, the States participating in the fourth United Nations Conference to Review Progress Made in the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and its International Tracing Instrument, convened in New York from 17 to 28 June 2024 reaffirm our commitment to the full and effective implementation of all of the provisions of the Programme of Action and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, through enhanced international cooperation and assistance with a view to promoting peace, security and sustainable development and reducing human suffering and socio-economic consequences caused by the illicit trade small arms and light weapons in all its aspects, bearing in mind the different situations, capacities and priorities of States and regions, hereby agree to the following measures, subject to the respective constitutional and legal systems of States.

1. We affirm our commitments to the full and effective implementation of the Programme of Action, and the International Tracing Instrument, which constitute the global frameworks to prevent, combat and eradicate the illicit trade in small arms and light weapons in all its aspects, as reiterated annually in the General Assembly resolution entitled “The illicit trade in small arms and light weapons in all its aspects”, and all commitments made during previous Review Conferences and Biennial Meetings of States.

2. We reaffirm States’ respect for and commitment to the obligations under international law, including the purposes and principles enshrined in the Charter of the United Nations.

3. We reaffirm States’ legitimate right to self-defence under Article 51 of the Charter of the United Nations and the right of each State to acquire, manufacture, manage and transfer small
arms and light weapons for its self-defence and security needs, as well as the principle of non-interference in the internal affairs of States.

4. We express grave concern about the escalating tensions, crises, armed violence and conflicts taking place in many regions of the world aggravated by the illicit trade of small arms and light weapons and the complexity of conflicts and threats which increases the demand for and heightened risks of diversion of small arms and light weapons to unauthorized recipients.

5. We express grave concern that the illicit trade in small arms and light weapons in all its aspects and the illicit manufacture, brokering, transfer, circulation, their excessive accumulation and uncontrolled proliferation, initiates, exacerbates and sustains armed violence, has a wide range of negative humanitarian and socioeconomic consequences, undermines the rule of law as well as the respect for international humanitarian law and international human rights law, and impedes the provision of humanitarian assistance to people affected by armed violence, including victims and survivors, and children.

6. We recognize the importance of preventing, combating and eradicating the illicit trade in small arms and light weapons, throughout their entire life cycle, as part of our efforts to prevent and combat the activities of criminals, organized criminal groups and terrorists, to mitigate diversion through the lines of supply and subsequent trafficking, with attention to the diverse regional and sub-regional characters of trafficking routes and networks through cooperation and coordination.

7. We reiterate that Governments bear the primary responsibility for preventing, combating, and eradicating the illicit trade in small arms and light weapons in all its aspects, in accordance with relevant international obligations and commitments, and the importance of States assuming strong national ownership of the full and effective implementation of the Programme of Action and the International Tracing Instrument.

8. We reaffirm States’ commitment to strengthening national capacities for full compliance with relevant Security Council resolutions and arms embargoes mandated by the Security Council in accordance with the Charter of the United Nations.

9. We call for the inclusion of dedicated technical expertise in the implementation of the Programme of Action and the International Tracing Instrument with a view to revitalizing future meetings and the review process of the Programme of Action.

10. We recognize the importance of action-oriented and tangible outcomes of the fourth Review Conference and continued cooperation and voluntary sharing of information and good practices for enhanced implementation of the Programme of Action and the International Tracing Instrument.

11. We reaffirm the importance of collecting standardized, data and producing analysis on illicit small arms and light weapons, where appropriate, feasible and consistent with national law for the purpose of designing, implementing and reviewing evidence-based policies and strategies that strengthen the full and effective implementation of the Programme of Action and the International Tracing Instrument at all levels.

12. We encourage States to regularly submit, as appropriate, their voluntary national reports to provide a baseline for the adequate measuring of progress, to promote transparency, and to facilitate international cooperation and assistance.

13. We acknowledge that voluntary national targets in support of the implementation of the Programme of Action and the International Tracing Instrument can support national ownership and measuring progress and can facilitate requests for assistance.

14. We call for more robust and effective implementation of all the principles and provisions of the Programme of Action and the International Tracing Instrument through action-oriented
measures throughout the entire life cycle of small arms and light weapons from the point of manufacture, prior to transfer, transfer, and transport, stockpiling and recovery, to their eventual use or disposal.

15. We reaffirm the fundamental commitment to effective marking, record-keeping and tracing of small arms and light weapons throughout their entire life cycle in line with the International Tracing Instrument, as appropriate and consistent with national law to combat their diversion to unauthorized recipients and their illicit transfer through concerted efforts at the national, regional and global levels.

16. We affirm States’ shared responsibilities to prevent, mitigate and combat the diversion of small arms and light weapons to unauthorized recipients, and their subsequent circulation on illicit markets and cross-border trafficking, by addressing risks at each stage throughout the entire life cycle of small arms and light weapons.

17. We reaffirm commitment to prevent and combat the diversion of small arms and light weapons to unauthorized recipients, as well as their illicit international transfer, taking into consideration that in the International Tracing Instrument small arms and light weapons are considered illicit if they are transferred without a licence or authorization issued by competent national authorities.

18. We reaffirm our commitment to preventing unauthorized re-exports of small arms and light weapons, in accordance with national laws and without prejudice to the right of States to re-export small arms and light weapons that they have previously imported, in accordance with their applicable bilateral agreements, including end user documentation agreed with the originating exporting State that stipulates the terms of re-export before their retransfer.

19. We recognize that effectively addressing small arms and light weapons diversion to unauthorized recipients is essential in achieving our shared goal of preventing and combating the illicit trade in small arms and light weapons. We affirm our commitment to implementing strategies that prioritize the prevention and mitigation of diversion, including remaining vigilant to the risk of diversion, strengthening border controls, enhancing international cooperation and assistance, improving stockpile management, and reinforcing diversion monitoring and analysis.

20. We recognize the importance of preventing, combating and eradicating the illicit trade in small arms and light weapons as part of efforts to prevent and address all forms of violence, including terrorism, domestic and crime, transnational organized crime and violent extremism, trafficking in persons and drugs, money laundering, and crimes that affect the environment and wildlife.

21. We note States’ shared responsibilities including arms producing, exporting, and importing States, to cooperate to prevent and address diversion to unauthorized recipients throughout the entire life cycle of small arms and light weapons.

22. We commit to exchange timely and up-to-date information on cases of diversion to unauthorised recipients, as appropriate and consistent with national law, to better identify and combat illicit trafficking throughout the supply chain.

23. We stress the urgency of international efforts and cooperation aimed at combating this trade simultaneously from both a supply and demand perspective. We note the need for States to understand and address the root causes and socio-economic drivers of the illicit trade in small arms and light weapons and devise appropriate ways of addressing them, according to their national laws and regulations.

24. We express concern that the illicit trade in and diversion of small arms and light weapons to unauthorized recipients impedes the achievement of gender equality, and we encourage
states to mainstream a gender perspective in the design and implementation of gender-responsive policies and programming on small arms and light weapons control.

26. *We reaffirm* that eradicating the illicit trade in small arms and light weapons contributes to preventing and combating human rights violations, gender-based violence, and conflict-related sexual violence.

27. *We underscore* the essential role of and need to strengthen cooperation with civil society actors in supporting the efforts of States to fully and effectively implement the Programme of Action and International Tracing Instrument at the community, national, regional and global levels.

28. *We encourage* the inclusion of perspectives and participation of young people in the implementation of the Programme of Action and the International Tracing Instrument, as appropriate and where relevant, and recognize the positive contribution of young people as agents for social change, economic development, and technological innovation.

29. *We recall* the need to ensure that international humanitarian law and international human rights law are taken into consideration in national small arms and light weapons transfer decisions.

30. *We are determined* to prevent and reduce the human suffering caused by the illicit trade in and diversion of small arms and light weapons in all their aspects and to address the differential impact of the illicit trade in small arms and light weapons on diverse groups, including women, men, girls and boys.

31. *We recall* the human cost of small arms and light weapons in conflict and non-conflict settings alike as raised by the Secretary-General in A New Agenda for Peace, and we welcome the relevant recommendations contained therein to address the illicit trade in small arms and light weapons.

32. *We acknowledge* the need to continue to mark progress towards the achievement of relevant Sustainable Development Goals, including Target 16.4, and lay the groundwork for the development of goals relevant to the implementation of the Programme of Action and the International Tracing Instrument in the post-2030 sustainable development framework.

33. *We stress* that the full and effective implementation of the Programme of Action and the International Tracing Instrument is essential for conflict prevention, post-conflict situations, peacebuilding, sustainable peace and development and the achievement of the Sustainable Development Goals.

34. *We recognize* the need for multi-sectoral and intergovernmental collaboration among relevant national stakeholders for the implementation of the Programme of Action and the International Tracing Instrument.

35. *We take into consideration* the possible impact of armed conflict fuelled by illicit small arms and light weapons on the environment, and the need to further explore how climate change can fuel armed conflict, and accelerate the illicit trade in small arms and light weapons associated with such conflicts.

36. *We recognize* that developments in the manufacturing, technology and design of small arms and light weapons encompass challenges and opportunities for the full and effective implementation of the Programme of Action and International Tracing Instrument in the context of efforts to address the illicit trade and illicit manufacture of these weapons, while bearing in mind the differing levels of the technological capacities and priorities of States and regions, and the need to address the technological gap including through transfer of technologies.
37. We recognize that technologies have the potential to strengthen the implementation of the Programme of Action and International Tracing Instrument.

38. We recognize the impacts of different forms of illicit manufacture on the full and effective implementation of the Programme of Action and the International Tracing Instrument, including the illicit employment of craft manufacturing technologies, including additive manufacture, such as 3D printing.

39. We call for the further strengthening of international cooperation and assistance in preventing, combating and eradicating the illicit trade in small arms and light weapons in all its aspects and implementing the International Tracing Instrument, to ensure the adequacy, accessibility, effectiveness and sustainability of international cooperation and assistance measures from the perspective of providers, donors and recipients including, funding, technology and equipment transfer and training programmes, stressing the importance of sustainable capacity-building measures and enhanced North-South, South-South and triangular cooperation, as well as strong national ownership.

40. We recognize the need to promote the full, equal, meaningful and effective participation of women in decision-making and implementation processes relating to the Programme of Action and the International Tracing Instrument at all levels, including in leadership roles and as agents of change.

41. We acknowledge the respective roles of all competent national authorities involved in the different stages in the life cycle of small arms and light weapons, as appropriate and consistent with national law, in preventing the illicit manufacture of and illicit trade in small arms and light weapons and in addressing their diversion and illicit trafficking.

42. We encourage strengthened cooperation with the private sector and industry to achieve the implementation of the Programme of Action and the International Tracing Instrument.

43. We reaffirm the importance of reinforcing regional and subregional cooperation, through improved coordination, consultation, information exchange and operational cooperation, as appropriate, with relevant regional and subregional organizations mechanisms, roadmaps and other initiatives as well as law enforcement, border control and export and import licensing authorities.

44. We recognize that the full and effective implementation of the Programme of Action and the International Tracing Instrument benefits from ensuring the inclusion, participation and perspectives of victims and survivors affected by armed violence and illicit small arms and light weapons and organizations representing them.

45. We welcome the adoption of the Global Framework for Through-life Conventional Ammunition Management, which is a cooperative framework that is voluntary and contains a set of political commitments for strengthening through-life conventional ammunition management, and is a separate instrument relevant to the Programme of Action.

46. We recognize the importance of strengthening coordination between the Programme of Action, the International Tracing Instrument and other relevant instruments to which a State is a party, to facilitate the implementation of the Programme of Action and the International Tracing Instrument, combat armed violence, significantly reduce the illicit trade in small arms and light weapons, and achieve the Sustainable Development Goals.

II. Action-oriented measures for effective implementation of the Programme of Action to Prevent, Combat and Eradicate the
Illicit Trade in Small Arms and Light Weapons in All Its Aspects, 2024–2030

Bearing in mind the different situations, constitutional and legal systems, capacities and priorities of States and regions, States resolve to undertake the following measures to prevent, combat and eradicate the illicit manufacture of and trade in small arms and light weapons in all their aspects, as well as the diversion and illicit international transfer of those weapons to unauthorized recipients:

A. Preventing, combating and eradicating the illicit trade in small arms and light weapons in all its aspects at all levels (national, subregional, regional and global)

Coordination and implementation at all levels

(a) Implementation at national level

47. To put in place, where they do not exist, adequate laws, regulations and administrative procedures to exercise effective national control throughout the entire life cycle of small arms and light weapons in all its aspects, including their manufacture, within their areas of jurisdiction and the export, import, transit, trans-shipment or retransfer of such weapons.

48. To apply and enforce adequate national controls throughout the entire life cycle of small arms and light weapons, in accordance with national legal frameworks, to minimize and mitigate the risk of diversion and the illicit international transfer of small arms and light weapons to unauthorized recipients, including criminals, organized criminal groups and terrorists.

49. To establish as a criminal offence, in accordance with national legal frameworks, the illegal manufacture of small arms and light weapons, including their manufacture without a license, and to effectively enforce applicable laws, regulations and administrative procedures.

50. To implement all commitments under the Programme of Action and the International Tracing Instrument related to the international transfer of small arms and light weapons and to strengthen or put in place, where they do not exist, measures for preventing diversion to illicit markets and to unauthorized recipients, including to criminals, organized criminal groups and terrorists, which may include export risk assessments, authenticated end-user and/or end-use certification and effective legal and enforcement measures, including, where appropriate, and in accordance with applicable bilateral agreements, post-shipment verification.

51. To make all reasonable efforts to prepare and submit voluntary national reports in a timely manner and on a biennial basis, to facilitate the most informed assessment of the Programme of Action and the International Tracing Instrument implementation.

52. To strengthen national capabilities and resources, in accordance with national laws and regulations to detect, mitigate and prosecute the diversion of small arms and light weapons to unauthorized recipients, bearing in mind the importance of a whole-of-government approach involving all relevant and competent national authorities.

53. To establish or designate, where they do not already exist, a national point of contact to act as a liaison on matters relating to the implementation of the Programme of Action; and to share and update this information regularly; and to provide the point of contact with the necessary means to carry out its role.

54. To strengthen coordinated national approaches for the implementation of the Programme of Action, including, as appropriate, the establishment or designation of national coordination
agencies or bodies involving relevant government agencies, including those responsible for law enforcement, border control and export and import licensing, and stockpile security.

55. To support illicit weapons recovery and voluntary surrender programmes to significantly reduce the illicit trade of small arms and light weapons.

56. To strengthen or create national capacities for consistent and systematic data collection and information sharing of seized illicit, diverted or trafficked small arms and light weapons, including illicitly manufactured small arms and light weapons.

57. To ensure that national systems, strategies, and action plans to address the illicit trade in small arms and light weapons consider the links between national points of contact for the implementation of the Programme of Action and respective national focal points and action plans on women, peace and security (WPS) and youth, peace and security (YPS) where they exist.

58. To encourage the development and implementation of voluntary national action plans or other national policies in support of the implementation of the Programme of Action by improving the measurement of progress of implementation and to coordinate the development and implementation of such plans or policies, as appropriate, in collaboration with relevant stakeholders, including those from civil society, the private sector and industry, with those relevant to Target 16.4 of the 2030 Agenda for Sustainable Development and to the relevant United Nations resolutions on women and peace and security and women, disarmament, non-proliferation and arms control.

59. To promote the full, equal, meaningful, and effective participation of women in mechanisms relating to the implementation of the Programme of Action.

60. To actively engage, support and cooperate with civil society, including non-governmental organisations, research organizations, academia, the private sector and industry, in efforts to implement the Programme of Action and the International Tracing Instrument.

61. To ensure the integration of youth considerations by analysing the youth-specific impacts of the illicit trade in small arms and light weapons, and ensure that the needs, perspectives and contribution of youth are incorporated into policies and plans in support of the implementation of the Programme of Action.

62. To take account of the differential impact of the illicit trade in small arms and light weapons on women, men, girls and boys, including by collecting, where feasible and safe to do so, data disaggregated by sex, gender, age, and disability, and utilizing analysis mechanisms to inform evidence-based gender-responsive policymaking and programming with a view to strengthening the full and effective implementation of the Programme of Action at all levels.

63. To facilitate and support the engagement of the United Nations, upon request, to support national efforts to implement the Programme of Action.

64. To ensure that efforts to implement the Programme of Action at the national level are consistent with commitments made in other relevant General Assembly resolutions, in particular the General Assembly resolution entitled “The illicit trade in small arms and light weapons in all its aspects”.

65. To consider the establishment, if not already in place, of national coordination agencies to develop expertise and improve analysis and strategic reporting on illicit trafficking in small arms and light weapons, including information sharing between relevant national authorities.

66. To establish or strengthen, as appropriate, national laws, regulations and administrative procedures for the coordinated national implementation of the Programme of Action and other relevant instruments, including legally binding instruments to which a State is a Party.
(b) Implementation at regional and subregional levels

67. To encourage relevant regional and subregional organizations and mechanisms to designate, and share information on, points of contact for work relating to the illicit trade in small arms and light weapons.

68. To encourage the sharing of experiences and lessons learned among regional and subregional organizations and mechanisms engaged in the establishment and implementation of regional and subregional road maps, instruments and other mechanisms.

69. To recognize the existing regional and subregional road maps, instruments and other initiatives to address the illicit trade in small arms and light weapons and encourage, where appropriate, the adoption, establishment and further strengthening of relevant and applicable regional and subregional instruments, mechanisms, targets and good practices to complement the global process and support the full and effective implementation of the Programme of Action and the International Tracing Instrument at the national level.

70. To consider establishing regional targets in support of the implementation of the Programme of Action and the International Tracing Instrument with a view to ensuring that regional ownership and priorities underpin resource mobilization, requests for assistance and assistance programmes as well as coordination efforts.

71. To consider, as appropriate, the establishment and implementation of further regional and/or subregional action plans, which could include goals and targets, measurable objectives and concrete indicators, with a view to addressing the illicit trade in small arms and light weapons in a comprehensive, sustainable and coordinated manner in the respective regions.

72. To encourage regional and sub-regional organizations to report to the United Nations on implementation of the Programme of Action and the International Tracing Instrument.

73. To continue strengthening the role of the United Nations regional centres for Peace and Disarmament in supporting the implementation of the Programme of Action.

74. To promote, where consistent with domestic laws and regulations, standardized data collection within regions to support the exchange of information, as appropriate, between law enforcement agencies, customs agencies and export and import licensing authorities.

(c) Implementation at the global level

75. To encourage States, relevant United Nations organs and agencies, and regional and international organizations, to address illicit trade in small arms and light weapons at the global level.

76. To encourage States, relevant United Nations organs and agencies, the International Criminal Police Organization (INTERPOL) and the World Customs Organization to enhance coordination, and share good practices and lessons learned, for the full and effective implementation of the Programme of Action.

77. To encourage, as appropriate, joint operations and other forms of operational cooperation with relevant international organizations, namely INTERPOL and the World Customs Organization, in combating the illicit trade in small arms and light weapons.

78. To encourage States, relevant United Nations organs and agencies, and international, regional and subregional organizations, as appropriate, to enhance their cooperation with relevant international governmental and non-governmental organizations in order to prevent and combat the illicit trade in small arms and light weapons.
79. To exchange and, as appropriate, apply experiences, lessons learned and good practices, including reporting practices, relating to the implementation of all other relevant instruments to which a State is a Party, in strengthening the implementation of the Programme of Action.

80. To acknowledge that States that apply provisions of the Programme of Action to small arms and light weapons ammunition can exchange and, as appropriate, apply relevant experiences, lessons learned and good practices acquired within the framework of other relevant instruments to which a State is a Party, as well as relevant international standards, in strengthening their implementation of the Programme of Action.

81. To prohibit and prevent the supply of small arms and light weapons to unauthorized recipients, including criminals, organized criminal groups and terrorists.

82. To establish, at the national level, as a criminal offence, the intentional supply of small arms and light weapons to terrorists, and to strengthen, where appropriate, judicial and law enforcement cooperation with other States.

83. To share information with other States, as appropriate and consistent with national law, on successful prosecutions, incidents of diversion to unauthorised recipients and to illicit markets, illicit international transfers, illicit brokering, illicit trafficking routes and techniques, and good law enforcement and regulatory practices, including risk management methods and processes to prevent and combat the illicit trade in small arms and light weapons.

84. To encourage relevant international organisations to report on the implementation of the Programme of Action and the International Tracing Instrument.

85. To share, as appropriate, effective practices and lessons learned in the prevention of illicit online small arms and light weapons transactions, including through the ‘dark web’ and other encrypted avenues, and the intangible transfer of small arms and light weapons designs that may facilitate illicit manufacture, including illicit craft and privately manufactured small arms and light weapons.

86. To take into account the differential impact of the illicit trade in small arms and light weapons on women, men, girls and boys, including by collecting, where feasible and safe to do so, data disaggregated by sex, gender, age and disability, and utilizing analysis mechanisms to inform evidence-based gender-responsive policymaking and programming with a view to strengthening the full and effective implementation of the Programme of Action at all levels.

87. To request the Secretariat, within existing resources, to prepare an analysis of progress in the trends, challenges and opportunities related to the implementation of the Programme of Action and the International Tracing Instrument, including with regard to national frameworks, based on information submitted and/or provided by Member States, for presentation at the Biennial Meeting of States in 2026 for consideration and appropriate follow-up.

Preventing and combating illicit manufacturing, diversion and illicit trafficking of small arms and light weapons, their parts and components, throughout their entire life cycle

(d) Preventing illicit manufacturing, reactivation and conversion of small arms and light weapons

88. To ensure that national small arms and light weapons manufacturing is consistent with the provisions of the Programme of Action and the International Tracing Instrument.

89. To take, as appropriate and consistent with national law, measures to combat illicit manufacturing of small arms and light weapons, including the illicit employment of craft manufacturing technologies, including additive manufacture, such as 3D printing.
90. To engage where appropriate in an active dialogue with the additive manufacture industry to prevent and combat the illicit use of 3D printing technology to manufacture illicit small arms and light weapons, while not hindering the legitimate use of these technologies.

Illicit manufacture

91. To ensure where possible, that manufacturers put in place diversion mitigation measures, as appropriate and consistent with national law, to address diversion and illicit trafficking.

92. To ensure, according to their national legal frameworks, the strict regulation of small arms and light weapons manufacturing, and to effectively enforce applicable laws, regulations and administrative procedures.

93. To establish, in accordance with national legal frameworks, the illicit manufacture of small arms and light weapons as a criminal offence.

94. Subject to any legal constraints associated with the preparation of criminal prosecutions, to destroy confiscated, seized or collected small arms and light weapons that have been illegally manufactured, unless another form of disposition or use has been officially authorized, in which case such weapons have been duly identified, marked and recorded.

Illicit conversion

95. To share national experiences in addressing the problem of illicitly converted small arms and light weapons, and data on the types of arms converted and conversion devices, with a view to developing common understandings of the kinds of items that may be easily and illicitly converted, including replica and blank-firing small arms and light weapons, and consider specific and appropriate responses to the challenges that they pose.

96. To specifically consider the challenges related to modular design and the use of polymers, notably the difficulties encountered in marking and tracing.

97. To strengthen cooperation and information exchange, as appropriate, on existing and new forms of illicit small arms and light weapons manufacture.

98. To ensure that relevant national laws, regulations and administrative procedures prohibit, in the areas under the State’s jurisdiction and control, the illicit trade in small arms and light weapons conducted through the internet.

(c) Preventing and combating the diversion of small arms and light weapons to unauthorized recipients throughout their entire life cycle

99. To recognize that diversion to unauthorized recipients is a persistent risk throughout the entire life cycle of small arms and light weapons.

100. To promote transparency throughout the lines of supply to consider the risk of diversion to unauthorized recipients comprehensively.

Supply chain management

101. To exercise oversight of the manufacture, import, brokering and export of small arms and light weapons as a means of minimizing and mitigating the risk of their diversion throughout their entire life cycle.

102. To take steps to establish and implement processes, where they do not already exist, to monitor, detect, document, report and investigate the diversion of small arms and light weapons to unauthorized recipients throughout their entire life cycle.

Prior to transfer
103. When authorizing the international transfer of small arms and light weapons, to take all appropriate measures to assess the risk of diversion to unauthorized recipients, and to take appropriate measures to prevent and mitigate diversion risks, according to strict national regulations and procedures consistent with the existing responsibilities of States under relevant international law, and acknowledging the legitimate needs of States to acquire small arms and light weapons in line with their right to self-defence.

104. To promote cooperation, especially between exporting and importing States, as well as transit States, to establish comprehensive diversion mitigation measures to address the risk of diversion of small arms and light weapons to unauthorised recipients and to illicit markets prior to transfer.

Transfer controls

105. With a view to preventing, combating, and eradicating the illicit brokering of small arms and light weapons, and as appropriate and consistent with national law, to develop adequate national legislation or administrative procedures to regulate brokering activities, including measures such as registration of brokers, licensing or authorization of brokering transactions as well as the appropriate penalties for all illicit brokering activities performed within the State’s jurisdiction and control, and taking note of the recommendations contained in the report of the Group of Governmental Experts established pursuant to resolution 60/81.

106. To exchange experiences, lessons learned and good practices relating to small arms and light weapons export, import and transit control, including end-user certificates, as appropriate and consistent with national law.

107. To strengthen the voluntary exchange of information on the illicit trade in small arms and light weapons, including cases of diversion to unauthorized recipients, unauthorized retransfer, and financing for the illicit acquisition of small arms and light weapons, as appropriate and consistent with national laws, including through the use of appropriate information-sharing systems.

Stockpile management and security

108. To ensure the safe, secure and effective stockpile management of all small arms and light weapon stockpiles under national control, to prevent their diversion to unauthorized recipients and to illicit markets.

109. To consider the opportunities that new technologies, when available, can offer for enhanced small arms and light weapons stockpile management and security, including through improved marking and record-keeping, and for the destruction of surplus, seized, obsolete and unserviceable small arms and light weapons that have been designated for destruction.

110. To take steps to prevent the illicit trade in and illicit manufacture of small arms and light weapons, in line with the provisions of the Programme of Action, as appropriate and consistent with national law, facilitated by the physical and electronic sharing of the plans, blueprints, designs, and construction data required for their illicit manufacture.

Irreversible deactivation and destruction

111. Without prejudice to national needs and priorities, to ensure that all surplus, confiscated, seized or collected small arms and light weapons that have been designated for destruction are destroyed or permanently deactivated, subject to any legal constraints associated with the preparation of criminal prosecutions. When other forms of disposition or use have been officially authorized, to duly mark and register such weapons as a means of reducing possible diversion to unauthorized recipients.
112. To take necessary measures, when a final decision is made to dispose of a small arm or light weapon by destruction or deactivation, to ensure that its destruction or deactivation has rendered the weapon, including all of its essential components, permanently inoperable in line with national law, regulations, and rules.

113. To exchange experiences, lessons learned and good practices and relevant standards relating to the destruction or permanent deactivation of small arms and light weapons to prevent their diversion to unauthorized recipients and to illicit markets.

114. To consider, as appropriate and consistent with national law, adopting national measures on the deactivation or destruction of small arms and light weapons to prevent diversion of small arms and light weapons to unauthorized recipients and to illicit markets.

115. To consider, as appropriate and consistent with national law, certifying deactivated small arms and light weapons, and to ensure that the deactivation of small arms and light weapons is undertaken by competent national authorities.

(g) Programme of Action in conflict and post-conflict situations

116. To take all necessary measures to prevent the illicit trade in and diversion of small arms and light weapons from exacerbating ongoing conflicts and the situations in regions emerging from recent conflict, taking into account the legitimate national defence and national security requirements.

117. To put in place adequate stockpile management and security measures for small arms and light weapons stockpiles located in areas affected by conflict or in post-conflict situations in line with the provisions of the Programme of Action and other relevant international instruments, including regular inventories, surplus disposal, including through destruction.

118. To fully apply the provisions of the Programme of Action and the International Tracing Instrument in programmes designed to build peace and security in conflict and post-conflict situations, including disarmament, demobilization and reintegration, implementing peace agreements, security sector reform and community violence reduction programmes.

119. To take international humanitarian law and international human rights law into account when assessing the risk of diversion to unauthorized recipients prior to authorizing transfers of small arms and light weapons to areas affected by, and emerging from armed conflict.

(h) Taking into account United Nations Security Council arms embargoes in implementing the Programme of Action

120. To encourage the consideration, as relevant, with the consent of host States, of provisions related to preventing and combating the illicit trade in small arms and light weapons in the mandates of United Nations peacekeeping missions, and to provide adequate capacity building support for missions and troop- and police-contributing countries to implement mandates.

121. Taking into account the relevant mandates and situations pertaining to arms embargoes mandated by the Security Council, to strengthen national capacities to fully implement arms embargoes mandated by the Security Council, and to cooperate with relevant sanctions monitoring panels, as appropriate, in accordance with the Charter of the United Nations, taking note of Security Council resolution 2616 (2021).

122. To call on peacekeeping missions, in accordance with their respective mandates, to provide national authorities at their request with capacity building to detect and combat illicit trade in small arms and light weapons and their illicit trafficking in violation of Security Council-mandated arms embargoes.
123. For those peacekeeping missions with a relevant Security Council mandate, to consider enhanced weapons technical information-gathering and analysis capabilities in support of their operations.

Encouraging transparency and information exchange

124. To redouble efforts to voluntarily report on a biennial basis on measures taken to implement the Programme of Action.

125. In order to strengthen implementation of the Programme of Action, to share and make full use of information on the illicit trade in small arms and light weapons, including identified cases of diversion to unauthorized recipients and trafficking, and diversion methods and observable trends, as appropriate and consistent with national law.

126. To encourage, as appropriate and consistent with national law, information exchanges and cooperation between law enforcement entities, including border control and customs authorities, and judicial entities in investigations, related criminal prosecutions, and efforts to prevent the diversion of small arms and light weapons to unauthorized recipients, including illicit shipments and transshipment.

B. Addressing the adverse consequences of the illicit trade in small arms and light weapons on peace, security and sustainable development

Consideration of the implementation of the Programme of Action for Sustainable Development

127. To take advantage of all relevant synergies between the implementation of the Programme of Action and the International Tracing Instrument, on the one hand, and the achievement of Agenda 2030 and “A New Agenda for Peace”.

128. To integrate small arms and light weapons control efforts into national development and prevention frameworks, to enhance efforts for the implementation of the Programme of Action and International Tracing Instrument and align such efforts with specific needs and national priorities, and with achievement of the Sustainable Development Goals.

129. To actively contribute to discussions and planning initiatives towards the development of a post-2030 sustainable development framework of relevance to the Programme of Action and the International Tracing Instrument.

The differential impacts of the illicit trade in small arms and light weapons on women, men, girls and boys

130. To take account of the differential impact of the illicit trade in small arms and light weapons on women, men, girls and boys, and to strengthen or, where they do not exist, develop response mechanisms to address that impact.

131. To recognize that eradicating the illicit trade in small arms and light weapons, including by addressing gender roles, norms and expectations for women and men to acquire illicit arms, contributes to preventing and combating gender-based and sexual violence and conflict-related sexual violence.

132. To address the persistent barriers to the full, equal, meaningful and effective participation and representation of women, including in leadership roles, and as agents of change, in all decision-making, planning and implementation processes related to the Programme of Action, such as national small arms commissions, programmes relating to community safety, violence reduction, collection and destruction of small arms and light weapons, stockpile management, conflict prevention and resolution and peacebuilding.
133. To ensure the coordination between national authorities responsible for the implementation of the Programme of Action and relevant ministries or other national authorities responsible for women’s affairs, gender equality or youth, as well as civil society groups.

134. To enhance, as appropriate, coordination processes relating to the implementation of the Programme of Action with processes relating to women, peace and security, women, disarmament, non-proliferation and arms control.

135. To incorporate good practices in mainstreaming gender perspectives into small arms and light weapons policies and programmes, including in the areas of programme design, planning, implementation, reporting, monitoring and evaluation, taking into account, as appropriate, relevant guidelines and standards.

136. To ensure, as appropriate, the mainstreaming of youth considerations by analysing the youth-specific impacts of the illicit trade in small arms and light weapons, and creating mechanisms to ensure that the needs, perspectives and potential contribution of youth are incorporated into policies and plans.

137. To encourage the coordinated implementation of voluntary national action plans on small arms and light weapons with national action plans established under United Nations resolutions on women and peace and security, youth and peace and security, and goals including Goal 5 of the 2030 Agenda for Sustainable Development.

138. To encourage, where feasible and safe to do so, the collection of data related to the differential impacts of the illicit trade in small arms and light weapons disaggregated by sex, gender, age, disability and other characteristics relevant in national contexts, including through national reports, and to increase understanding of the gender-specific impacts of the illicit trade in small arms and light weapons, in particular for the purpose of improving corresponding national policies and programmes.

139. To encourage the engagement and participation of men and boys in mainstreaming gender perspectives into small arms and light weapons policies and programmes.

140. To fully assess the intricate linkages between armed violence associated with illicit small arms and light weapons and the health of women, men, girls and boys, which constitutes both a public and mental health concern. Addressing the mental health impacts of such violence requires strategies and programs aimed at prevention while also providing comprehensive social safety nets for victims and survivors.

Promotion of a culture of peace in combating the illicit trade in small arms and light weapons

141. To promote, at all levels, a culture of peace through education and inclusive public awareness programmes on the problems of the illicit trade in small arms and light weapons in all its aspects.

142. To take steps to assess the root causes of armed violence and conflict and incorporate findings into efforts to address the illicit trade in small arms and light weapons in all its aspects.

143. To include, where feasible, as part of measures to reduce the illicit trade in small arms and light weapons in all its aspects, public education and awareness raising efforts focusing on the negative impacts and human costs of illicit small arms and light weapons.

III. Action-oriented measures for effective implementation of the International Instrument to Enable States to Identify and Trace,
in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons, 2024-2030

Bearing in mind the different situations, constitutional and legal systems, capacities and priorities of States and regions, States welcome progress made in the implementation of the International Tracing Instrument; note the challenges to the implementation of the Instrument, whether continuing, recent or emerging, including the need for enhanced international cooperation and assistance; and resolve to take a comprehensive approach to prevent, combat and eradicate the illicit trade in small arms and light weapons in all its aspects, including the through-life diversion of small arms and light weapons and illicit international transfer to unauthorized recipients and undertake the following measures to achieve the full and effective implementation of the International Tracing Instrument over the period 2024–2030.

A. General

144. To recognize the importance of national laws, regulations, and administrative processes, to ensure the effective implementation of the International Tracing Instrument for the marking, record-keeping and tracing of small arms and light weapons, to prevent and combat the diversion of small arms and light weapons to unauthorized recipients and their illicit international transfer.

145. To reinforce efforts and enhance capacities to mark, record and trace small arms and light weapons in accordance with the provisions of the International Tracing Instrument, and to maintain, develop or establish reliable and effective national legal and administrative framework.

146. To exchange information among relevant national authorities as appropriate and consistent with national law and in line with the International Tracing Instrument, with a view to including all relevant information when responding to tracing requests, as appropriate, in a timely and reliable manner.

147. To ensure the effectiveness of the International Tracing Instrument in the light of developments in the manufacturing, technology and design of small arms and light weapons and implement the commitments under the International Tracing Instrument regardless of the materials or manufacturing methods used.

B. Marking

148. To adopt legislative and other measures in line with the provisions of the International Tracing Instrument to prohibit the illicit manufacture of small arms and light weapons, including unmarked or inadequately marked small arms and light weapons.

149. To specify in national legislation the small arms and light weapons control components that require unique marking and apply the marking standards specified in the International Tracing Instrument.

150. To cooperate with the private sector and industry, where appropriate, in developing durable marking of small arms and light weapons in line with the provisions of the International Tracing Instrument.

151. To explore and take advantage of opportunities presented by technological developments for enhanced marking, record-keeping and the recovery of obliterated markings, in line with the provisions of the International Tracing Instrument.

152. To work towards a shared understanding of what constitutes an essential, structural or control component of small arms and light weapons.
C. Record-keeping

153. To establish and maintain accurate and comprehensive record-keeping mechanisms in line with the provisions of the International Tracing Instrument.

154. To ensure the accurate and comprehensive record-keeping of small arms and light weapons, consistent with national law, sufficient to enable competent national authorities to trace illicit small arms and light weapons in a timely and reliable manner in line with the provisions of the International Tracing Instrument.

155. To ensure record-keeping practices for small arms and light weapons that are seized and collected for destruction in line with the provisions of the International Tracing Instrument.

D. Tracing

156. To ensure the tracing of small arms and light weapons in line with the provisions of the International Tracing Instrument.

157. To consult records within the State where the illicit small arm or light weapon was found and/or consult with the State of manufacture, export and/or re-export when tracing illicit small arms and light weapons in line with the provisions of the International Tracing Instrument.

158. To ensure the retrievability and secure storage of all relevant records to facilitate the timely and reliable tracing of illicit small arms and light weapons.

159. To strengthen efforts to accurately identify and trace small arms and light weapons, including through training, capacity-building, cooperation and sharing of information, and through the transfer of technologies, good practices and tools relevant to tracing illicit transfers of small arms and light weapons to ensure the full and effective implementation of the International Tracing Instrument.

160. To strengthen adequate, timely and reliable responses to tracing requests between States in line with the provisions of the International Tracing Instrument and to reinforce judicial, law enforcement and other forms of cooperation between them with regard to tracing requests to facilitate criminal investigations and criminal justice responses, in line with national laws and regulations, and bearing in mind considerations of national security or ongoing prosecution processes.

161. To leverage, as appropriate and consistent with national law, civil society in strengthening efforts for tracing illicit small arms and light weapons.

E. Encouraging transparency, information exchange and coordination

162. To enhance international cooperation in tracing and the voluntary sharing of information on the handling of tracing requests with the United Nations Secretariat as part of national reports.

163. To enhance the exchange, in accordance with national legal frameworks, of tracing results between appropriate authorities, including those responsible for law enforcement, border control and export and import licensing, in conformity with the provisions of the International Tracing Instrument, in order to prevent the diversion of small arms and light weapons to illicit markets.

164. To strengthen information exchange as appropriate and consistent with national law, on the illicit manufacture of small arms and light weapons, including illicitly manufactured craft-weapons.

165. To report on a biennial basis, as part of the voluntary national reports, on measures taken to implement the International Tracing Instrument including for the purpose to report
accurately on the Sustainable Development Goal indicator 16.4.2 to significantly reduce illicit arms flows by 2030.

166. To reinforce, as appropriate and in accordance with national law, the judicial and law enforcement cooperation between States on tracing requests in line with the provisions of the International Tracing Instrument, to facilitate criminal investigations and criminal justice response and bearing in mind considerations of national security and ongoing prosecution processes.

167. To cooperate with INTERPOL and World Customs Organisation and consider the use of their tools including INTERPOL’s Firearms Reference Table, the INTERPOL National Central Bureau system, the INTERPOL illicit Arms Records and tracing Management System (iARMS), the INTERPOL Ballistic Information Network, SAFE Framework of Standards, Customs Enforcement Network (CEN), and other relevant systems.

168. To encourage States in a position to do so to assist other States in building sustainable national capacity in the marking, identification, recordkeeping and tracing of small arms and light weapons, including in assisting States to accurately identify markings on small arms and light weapons to facilitate the tracing of illicit small arms and light weapons with a view to enhancing the submission of and responses to tracing requests, and to encourage States receiving that assistance to take strong national ownership and ensure the sustainability of the assistance provided, including in conflict and post-conflict situations, and to address the technological gap especially between developed and developing countries.

169. To encourage the implementation and sharing of good practices at regional and subregional levels to support the implementation of the International Tracing Instrument.

170. To request the Secretariat to conduct a study on obliterated markings and methods for marking recovery in the context of the International Tracing Instrument and report to the next Biennial Meeting of States.

171. To encourage coordination with marking, record-keeping and tracing commitments and measures towards the implementation of the Global Framework for Through-life Conventional Ammunition Management.

IV. Action-oriented steps to address developments in small arms and light weapons manufacturing, technology and design for the implementation of the Programme of Action and the International Tracing Instrument, 2024–2030

Bearing in mind the different situations, constitutional and legal systems, capacities and priorities of States and regions, States resolve to undertake the following measures to address the challenges posed by and opportunities associated with developments in small arms and light weapons manufacturing, technology and design and for the full and effective implementation of the Programme of Action and the International Tracing Instrument, with special consideration of the implications for international cooperation and assistance

Programme of Action

172. To take advantage of opportunities presented by technological developments to enhance prevention, mitigation and detection of diversion of small arms and light weapons through their lines of supply to unauthorized recipients and to illicit market, and to strengthen implementation of the Programme of Action and International Tracing Instrument, including in the areas of marking, tracing and stockpile management and security of small arms and light weapons, and for enhancing intelligence-led approaches to combating the illicit trade, illicit
manufacturing, and the diversion of small arms and light weapons to unauthorized recipients, including through, inter alia, including identification and interdiction efforts, cyber-patrolling and crime scene investigations.

173. To strengthen, where appropriate and in line with national laws, cooperation with the private sector, and industry on technologies that improve the marking, record-keeping, diversion profiling and tracing of small arms and light weapons, and their safe and secure storage.

174. To take account of developments in small arms and light weapons manufacturing, technology and design in particular technologies employed in the illicit manufacturing and the design of illicitly manufactured small arms and light weapons, in the implementation of the Programme of Action and the International Tracing Instrument, including illicit additive manufacturing, and to strengthen cooperation between law enforcement agencies so as to prevent illicit trade in illicitly manufactured small arms and light weapons to unauthorized recipients, including criminals, organized criminal groups and terrorists.

175. To encourage initiatives that raise the awareness of possible risks associated with certain technologies employed in the illicit manufacturing of small arms and light weapons and their illicit trade while also promoting the opportunities offered by such technologies to facilitate the full and effective implementation of the Programme of Action.

176. To exchange of experiences, lessons learned, good practices and relevant standards relating to efforts to address the illicit manufacture of small arms and light weapons, including illicitly manufactured craft small arms and light weapons for the full and effective implementation of the Programme of Action.

International Tracing Instrument

177. To identify and address the challenges and opportunities posed by developments in small arms and light weapons manufacturing, technology and design for enduring marking, record-keeping and tracing capabilities.

178. To strengthen, where appropriate and in line with national laws, cooperation with the private sector and industry in addressing the challenges posed by and opportunities associated with the developments in small arms and light weapons manufacturing, technology and design to improve practices and reduce the costs of marking, record-keeping, and tracing for the full and effective implementation of the International Tracing Instrument.

179. To build sustainable capacity, including by facilitating the transfer of technology, and reinforce in a concrete manner international cooperation and assistance, and exchange of good practices in order to strengthen States’ capacities in identifying, marking, recording and tracing small arms and light weapons by States in a position to do so.

Open-ended Technical Expert Group

180. Decide to establish an open-ended technical expert group in 2026, [in lieu of the Biennial Meeting of States / as part of the Biennial Meetings of States] to develop and adopt by [2026 / 2028] [agreed recommendations / annexes to the Programme of Action and International Tracing Instrument / political commitments] to ensure the full and effective implementation of the Programme of Action and International Tracing Instrument in relation to technological developments including through the provision of international cooperation and assistance.

181. To mandate the Technical Expert Group:

a. To determine the means of ensuring the effective implementation of the International Tracing Instrument, in particular its Paragraph 7 in relation to the use of polymers in small arms and light weapons manufacturing.
b. To determine means of ensuring that the provisions of the International Tracing Instrument related to marking, record-keeping, and tracing can be effectively implemented for modular small arms and light weapons.

c. To determine means of addressing the challenges posed by the illicit 3D printing of small arms, light weapons, their parts, components and accessories, to the effective implementation of the International Tracing Instrument and the Programme of Action, including Programme of Action provisions related to small arms manufacturing and the international transfer of small arms and light weapons, as well as the transfer of information facilitating small arms and light weapons production.

d. To identify and address any current and new developments in small arms and light weapons manufacturing, technology and design that pose particular challenges to the effective implementation of the Programme of Action and the International Tracing Instrument.

e. To identify and assess opportunities presented by technologies to strengthen national practices in marking, record-keeping and tracing, identification and interdiction of illicit small arms and light weapons; and enhancing security measures throughout the entire life cycle.

f. To identify opportunities to reinforce international cooperation and assistance to build the capacities of States including sharing expertise and good practices and provide training opportunities for women and young people, to address the challenges and take advantage of the opportunities presented by technological developments, including strengthening tracing capabilities, addressing technology gaps and cooperating with the private sector, industry and civil society in the development of technologies that improve the marking, record-keeping, tracing and safe, secure and effective storage of small arms and light weapons.

g. To take into consideration the deliberations of the first and second Open-ended Meetings of Governmental Experts on the Implementation of the Programme of Action.

h. To identify how further technological developments in the field of small arms and light weapons should be considered in the future.

182. To urge States to include subject matter technical experts in their delegations, including technical experts in the field of marking, record-keeping, tracing, and small arms and light weapons forensic investigations.

183. To foster exchanges, sharing of information and cooperation with the private sector, industry, civil society and academia, to inform the deliberations of the open-ended technical expert group, including through the delivery of briefings on technical matters.

V. Action-oriented measures to promote effective international cooperation and assistance to ensure the effective implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons, 2024–2030
Bearing in mind the different situations, constitutional and legal systems, capacities and priorities of States and regions, and stressing that adequate, effective and sustainable international cooperation and assistance remain essential to the full and effective implementation of the Programme of Action and the International Tracing Instrument, States resolve to undertake the following measures in accordance with national law to promote effective international cooperation and assistance to prevent, combat and eradicate the illicit manufacture of and trade in small arms and light weapons in all their aspects, as well as the diversion and illicit transfer of such weapons to unauthorized recipients.

A. Encouraging international cooperation for the full and effective implementation of the Programme of Action and the International Tracing Instrument

184. To strengthen, as appropriate, partnerships and cooperation at all levels in preventing and combating the illicit trade in small arms and light weapons in all its aspects throughout the entire life cycle, in particular on border and customs control; marking, record-keeping and tracing; diversion monitoring; illicit brokering, stockpile management and security; destruction and disposal.

185. To collaborate on capacity-building initiatives to enhance the capabilities of both the exporting and importing States in mitigation of diversion of small arms and light weapons to unauthorised recipients.

186. To strengthen the exchange of information and the use of secured databases, as appropriate, in combating the illicit trade in small arms and light weapons, as well as the provision of technical and financial assistance, as appropriate, for the purpose of strengthening national capacities in this area.

187. To use national points of contact to strengthen the exchange of information and other forms of international cooperation, including operational cooperation, in support of the implementation of the Programme of Action and the International Tracing Instrument.

188. To conduct joint border activities to monitor, prevent, detect, and intercept cross-border trafficking of small arms and light weapons including though information sharing between neighbouring countries, as feasible.

189. To encourage cooperation and assistance with a view to enhancing the control of craft manufacturing of small arms and light weapons and privately manufactured small arms and light weapons.

190. To strengthen cooperation with relevant United Nations organs and agencies, in supporting States in strengthening the implementation of the Programme of Action and the International Tracing Instrument.

191. To strengthen cooperation with subregional and regional organizations, including through the role of United Nations regional centres for Peace and Disarmament.

192. To strengthen, where appropriate and in line with national laws, cooperation between national law enforcement agencies, national policy-making bodies, INTERPOL and the World Customs Organization, including the exchange of good practices, lessons learned, observable trends, and other relevant information, in combating the illicit trade in small arms and light weapons.

193. To enhance dialogue and partnerships, where appropriate and in line with national laws, with private sector and the industry regarding effective small arms and light weapons marking and record-keeping, as well as tracing of illicit small arms and light weapons, especially in the
light of recent developments in small arms and light weapons manufacturing, technology and design.

194. To encourage and, as appropriate, strengthen cooperation with and support for civil society, including non-governmental organizations, research organizations, academia, the private sector and industry, in furthering the implementation of the Programme of Action and the International Tracing Instrument, and to draw on their experiences, expertise and good practices for this purpose.

B. Ensuring the full and effective implementation of the Programme of Action and the International Tracing Instrument through adequate, effective and sustainable international assistance

195. To work towards adequate, measurable, nationally owned, and timely international cooperation and assistance that focuses on national priorities and sustainable outcomes and impacts to ensure the full and effective implementation of the Programme of Action and the International Tracing Instrument aligning assistance programs with the specific needs and contexts or requesting States to maximize their effectiveness and sustainability.

196. To explore ways to ensure and further strengthen comprehensive, coherent, and sustainable international assistance related to all aspects of the illicit trade and diversion of small arms and light weapons.

197. To encourage States in a position to do so to share expertise, provide financial support, transfer knowledge, resources, equipment and technology, explore South-South and triangular cooperation, bearing in mind that they are not a substitute for North-South cooperation, and build institutional capacities to strengthen border control, national customs and law enforcement to prevent diversion to unauthorised recipients and to illicit markets, in particular by loss and theft, through the safe, sustainable, secure and efficient management of stockpiles of small arms and light weapons and the responsible disposal, preferably through destruction, of any surplus.

198. To urge States, international, regional, and subregional organizations, as well as United Nations regional centres for Peace and Disarmament, in a position to do so, to provide technical assistance, including training and other forms of capacity-building support, including relevant technology and equipment, to States requesting such assistance.

199. To urge States in a position to do so to increase assistance and transfer of technology to, especially developing countries, upon request, in order to bridge the technological gap between States, where it exists, in implementing the Programme of Action and the International Tracing Instrument, including in the areas of marking, record-keeping and tracing of small arms and light weapons; and also to urge States in a position to do so to enhance the transfer of relevant knowledge, technology and equipment for this purpose.

200. To consider the development of appropriate national frameworks, dedicated structures, procedures and capabilities, including guidelines or policies and organizational development, as well as capacity-building programmes, including development of proposals, provision of technical expertise and technology transfers to build sustainable capacities for addressing the diversion and illicit trafficking of small arms and light weapons.

201. To promote the development and regular updating of user-friendly tools, courses, and good practice guidance such as the Modular Small Arms Implementation Compendium (MOSAIC), and its assessment tool, to assist States in addressing diversion and the illicit trade in small arms and light weapons.
202. To request the Secretariat to sustain ongoing reviews of the Modular Small Arms Implementation Compendium modules/guidance including reviewing their governance structure and to promote global accessibility by supporting the publication of the modules of the Compendium, its assessment tool, and related support resources, online and in multiple languages.

203. To urge States to consider making available financial assistance and improved funding arrangements, including through the utilization of Official Development Assistance-eligible funds, existing UN Trust Funds and other funding mechanisms including through bilateral assistance and national budgeting.

204. To urge States in a position to do so to make financial contributions to the Secretary-General’s Saving Lives Entity (SALIENT), dedicated to providing sustainable, cross-sectional, multi-year programming focused on eradicating the illicit trade in small arms and light weapons in settings of conflict and pervasive crime, and other existing funding arrangements such as the United Nations Trust Facility Supporting Cooperation on Arms Regulation (UNSCAR) and to encourage the timely and effective implementation of respective initiatives under those arrangements.

205. To urge the promotion of good practices and lessons learned concerning modalities and procedures for international cooperation and assistance aimed at ensuring the effective implementation of the Programme of Action by, among other things, promoting the full, equal, meaningful and effective participation of women, engaging youth and further encouraging the mainstreaming of a gender perspective and youth-related considerations in the implementation of the Programme of Action.

206. To make full use of national reports on the implementation of the Programme of Action and the International Tracing Instrument to identify needs and opportunities, communicate requests for international assistance and cooperation, including the matching of needs with available resources and expertise, and share progress and achievements in international assistance.

207. To encourage the use of voluntary, nationally owned baseline assessments and relevant findings with a view to address needs in a comprehensive and sustainable manner and to inform areas of enhancement throughout the entire life cycle of small arms and light weapons.

208. To encourage States in a position to do so to embed technology transfers in broader cooperation frameworks so as to build sustainable capacities for the life-cycle management of small arms and light weapons.

209. To encourage the reinforcement of international cooperation and assistance to make use of new technologies for marking, record-keeping and tracing, where available, in strengthening the implementation of the International Tracing Instrument in the light of recent developments in small arms and light weapons manufacturing, technology and design.

210. To promote regional mentoring, training and infrastructure assistance programmes for preventing, mitigating and combating the illicit trade in and diversion of small arms and light weapons.

211. To establish or strengthen assistance programmes for victims, survivors and others affected by armed violence and armed conflict.

212. To support the implementation of the Fellowship Training Programme on Small Arms and Light Weapons to strengthen technical knowledge and expertise in areas related to the implementation of the Programme of Action and the International Tracing Instrument, particularly in developing countries.
213. To encourage States and the United Nations to make use of the United Nations Country-level development instruments, such as the Common Country Assessment and the UN Sustainable Development Cooperation Frameworks, as mechanisms to identify and leverage resources for international assistance towards the achievement of Goal 16 of the Sustainable Development Goals.

C. Coordination of International Assistance for the full and effective implementation of the Programme of Action and the International Tracing Instrument

214. To continue to improve coordination among assistance providers, between assistance providers and recipients, and among relevant stakeholders and national authorities.

215. To ensure national ownership of international assistance projects by, inter alia, involving national authorities in the project planning and implementation cycle and tailoring assistance to support national structures, procedures, and legal frameworks, as appropriate, upon request by the recipient State and with the consent of the provider(s).

216. To request the Secretariat to establish and maintain a structured procedure to process offers and requests for assistance submitted under the Programme of Action and the International Tracing Instruments and to work towards matching needs and resources, and in that regard:

a. To maintain and further develop the dedicated reporting website as an information sharing platform with good practices, lessons learned and relevant ongoing and upcoming international assistance activities related to the implementation of the Programme of Action and the International Tracing Instrument.

b. To strengthen the exchange of information on assistance projects and programmes, including experiences on completed assistance projects and on existing and new coordination mechanisms.

c. To liaise and cooperate with bilateral and multilateral assistance providers, including across the UN system, as well as other global and regional assistance mechanisms to identify opportunities, ensure complementarities and avoid duplication.

d. To promote clarity and transparency through the development of criteria for possible prioritization and coordination of assistance.

e. To review national reports to assess tailored assistance needs for further consideration of the requesting State.

f. To develop templates for assistance offers and requests and project proposals.

g. To liaise with requesting States, providers, donors, existing assistance mechanisms, and implementing partners to maximize opportunities for matching needs, resources, and technical capacities.

h. To support requesting States in refining their requests for assistance, including in the process prior to preparing their requests and in their follow-up to ensure that requests are better fulfilled and focus on specific actions.

i. To support nationally owned baseline assessments and scoping missions, upon request by requesting States.

j. To provide technical assistance and support for the development of project proposals upon request by States.

k. To make proposals received available to providers and other stakeholders, as appropriate.
l. To provide assistance through SALIENT and UNSCAR, as appropriate.

m. To liaise with Member States in a position to do so, to encourage financial contributions and active participation in SALIENT, UNSCAR, and other relevant funding mechanisms such as trust funds or other mechanisms.

n. To promote UNSCAR as a support mechanism for states to access, and in this regard, encourage projects in partnership with relevant stakeholders

o. To monitor projects implemented and, as appropriate to report back on overall trends and on general activities undertaken to the Biennial Meetings of States and the Review Conferences.

217. To establish or strengthen subregional, regional and cross regional cooperation, coordination and information-sharing mechanisms in order to enhance the effectiveness of assistance programmes, strengthen the matching of needs with resources, improve dialogue between providers and recipients, avoid duplications and maximize complementarities.

218. To enhance coordination, establishing and maintaining sustainable funding sources, and maximize the role of relevant stakeholders, including non-governmental organizations and civil society, academia, research institutions and private sector and industry.

VI. Follow-up to the Fourth Review Conference of the Programme of Action

States, reaffirming the importance of enhancing the coherence, effectiveness and continuity of the process of implementing the Programme of Action and the International Tracing Instrument, and recalling the recommendation to link and ensure the complementarity of meeting outcomes, such as those of the review conferences, the biennial meetings of States and related processes.

A. Schedule of meetings

219. Decide to hold, in accordance with the relevant provision of the Programme of Action, a one-week biennial meeting of States in 2026 to consider; [theme to be discussed / technological developments]

220. Decide to hold, in accordance with the relevant provision of the Programme of Action, a one-week biennial meeting of States in 2028 to consider.; [theme to be discussed / achievement of the Sustainable Development Goals through the Programme of Action / Mitigation of through-life diversion and trafficking in small arms and light weapons].

221. Decide to hold a fifth United Nations conference to review progress made in the implementation of the Programme of Action and the International Tracing Instrument in 2030. The Fifth Review Conference will be scheduled as a two-week event and will be preceded by a preparatory committee meeting of not more than five days.

222. Reaffirm the importance of the early designation of the President of the Review Conference and the Chair of future meetings on the Programme of Action and the International Tracing Instrument, and encourage the relevant regional group to make such nominations, if possible, at least one year in advance of the corresponding meeting

223. To encourage, where relevant, the alignment of the timing of meetings regarding illicit small arms and light weapons with the global cycle of disarmament meetings, so as to ensure, as appropriate, synergies between actions taken at the national, subregional, regional and global levels.
224. Decides that the Open-ended Technical Expert Group will convene [for five days in 2026 in lieu of the Biennial Meeting of States / starting in 2026 as part of the Biennial Meetings of States and the Review Conferences / for five days in 2026 in lieu of the Biennial Meeting of States and from 2028 onwards as part of the Biennial Meetings of States and the Review Conferences] and also decides to consider convening preparatory and intersessional informal meetings in a virtual format to ensure proper preparations for the formal meetings of the Open-ended Technical Expert Group.

**B. Regional and sub-regional meetings**

225. Encourage interested States and subregional, regional and international organizations in a position to do so to convene or fund subregional or regional meetings in preparation for the meetings on the Programme of Action and the International Tracing Instrument.

**C. Meeting participation**

226. Encourage States in a position to do so to provide financial assistance through a voluntary sponsorship programme to enable States and other stakeholders that are otherwise unable to do so to participate in meetings on the Programme of Action and the International Tracing Instrument.

227. Encourage the equal, full and effective participation of women and men in the meetings on the Programme of Action and the International Tracing Instrument and take steps to ensure gender balance in delegations in the Fifth Review Conference, as well as to address any barriers in this regard.

228. Request the Secretariat to report at biennial meetings of states, review conferences and other relevant meetings on overall progress among delegations in achieving gender balance.

229. Encourage Member States to nominate women as candidates for the positions of President of the Review Conference and Chair of the Biennial Meetings of States and encourage Presidents and Chairs to continue to strive for both gender and geographical balance within the Bureaux of future meetings.

230. Encourage specific measures to facilitate the meaningful and inclusive engagement and empowerment of youth, in particular young people affected by small arms and light weapons.

231. Encourages measures for inclusion and accessibility of persons with disabilities to meetings of the Programme of Action and request the Secretariat to reinforce the United Nations Disability Inclusion Strategy in this context.

232. Encourage civil society, including non-governmental organizations and the private sector and industry, to engage, as appropriate, in meetings on the Programme of Action and the International Tracing Instrument.

233. Encourage the participation of appropriate experts from States, including fellows from the Fellowship Training Programme on Small Arms and Light Weapons Control, in accordance with the topics of the Biennial Meetings of States and Review Conferences.
